

GMO Testimony HB 6519

Dear Sir/Madam ~

I have only just now heard about this hearing now, so I apologize for the abrupt note. I assure you, I have strong feelings regarding this matter, and normally carry on, but the timing of this not prohibits a lengthy expose.

Bottom line ~ if corn or other "food" is being engineered to kill off pests from the inside, WHY would we EVER want to eat this ourselves or feed it to our children?? If it kills bugs, what's it going to do to us? It's not safe, and I have the right as a consumer to not purchase items that include GMO ingredients. I am an informed consumer, and buy organic whenever possible, but as it stands right now, I have NO idea if my organic purchases include hazardous ingredients. That's not fair. I have the RIGHT to know what I am buying.

Please stand up for the American People.

Blessings,

Kimberley Wallace
